FOREWORD

This book contains an up-to-date record and comparison of the relative hazard ratings of railway-highway grade crossings on the Federal Aid Primary System and the Federal Aid Secondary System in the State of Montana. These new ratings supplant previous ratings reported in a similar book prepared in 1953.

The following is offered in explanation of the data reported in the various columns of the tabulations:

COUNTY AND COUNTY NUMBER

Self-explanatory

PROJECT NUMBER AND AGREEMENT NUMBER

These numbers identify the Federal Aid project number and the agreement number for the section of highway on which the crossing is located.

SYSTEM

Code:

- 1 - Federal Aid Primary System
- 2 - Federal Aid Secondary System

CATEGORY

Code:

- 1 - Rural crossings
- 2 - Crossings in cities under 5,000 population
- 3 - Crossings in cities over 5,000 population

ROUTE

This identifies the Federal Aid route number on which the crossing is located. Routes bearing numbers 1 through 53 are on the Federal Aid Primary System. Routes bearing numbers 201 and up are on the Federal Aid Secondary System

Digitized by the Internet Archive
in 2014

<http://archive.org/details/railwayhighwaygr1961mont>

RAILROAD

Code:

- 1 - Great Northern Railway
- 2 - Northern Pacific Railway
- 3 - Chicago, Milwaukee, St. Paul and Pacific Railroad
- 4 - Chicago, Burlington and Quincy Railroad
- 5 - Union Pacific Railway
- 6 - Butte, Anaconda and Pacific Railway
- 7 - Soo Line Railroad
- 8 - Montana Western Railway
- 9 - White Sulphur Springs and Yellowstone Park Railway

PROTECTION

This item identifies the type of existing protection at the railway crossing.

Code:

- 0 - Advance warning and cross-buck signs
- X - Automatic signals
- G - Crossing gates

LOCATION

This item identifies the general location of the crossing.

AVERAGE DAILY TRAFFIC (A.D.T.)

This column shows the average daily traffic of all vehicles using the highway at the point of crossing. Figures shown are 1960 traffic counts.

AVERAGE NUMBER OF TRAINS DAILY

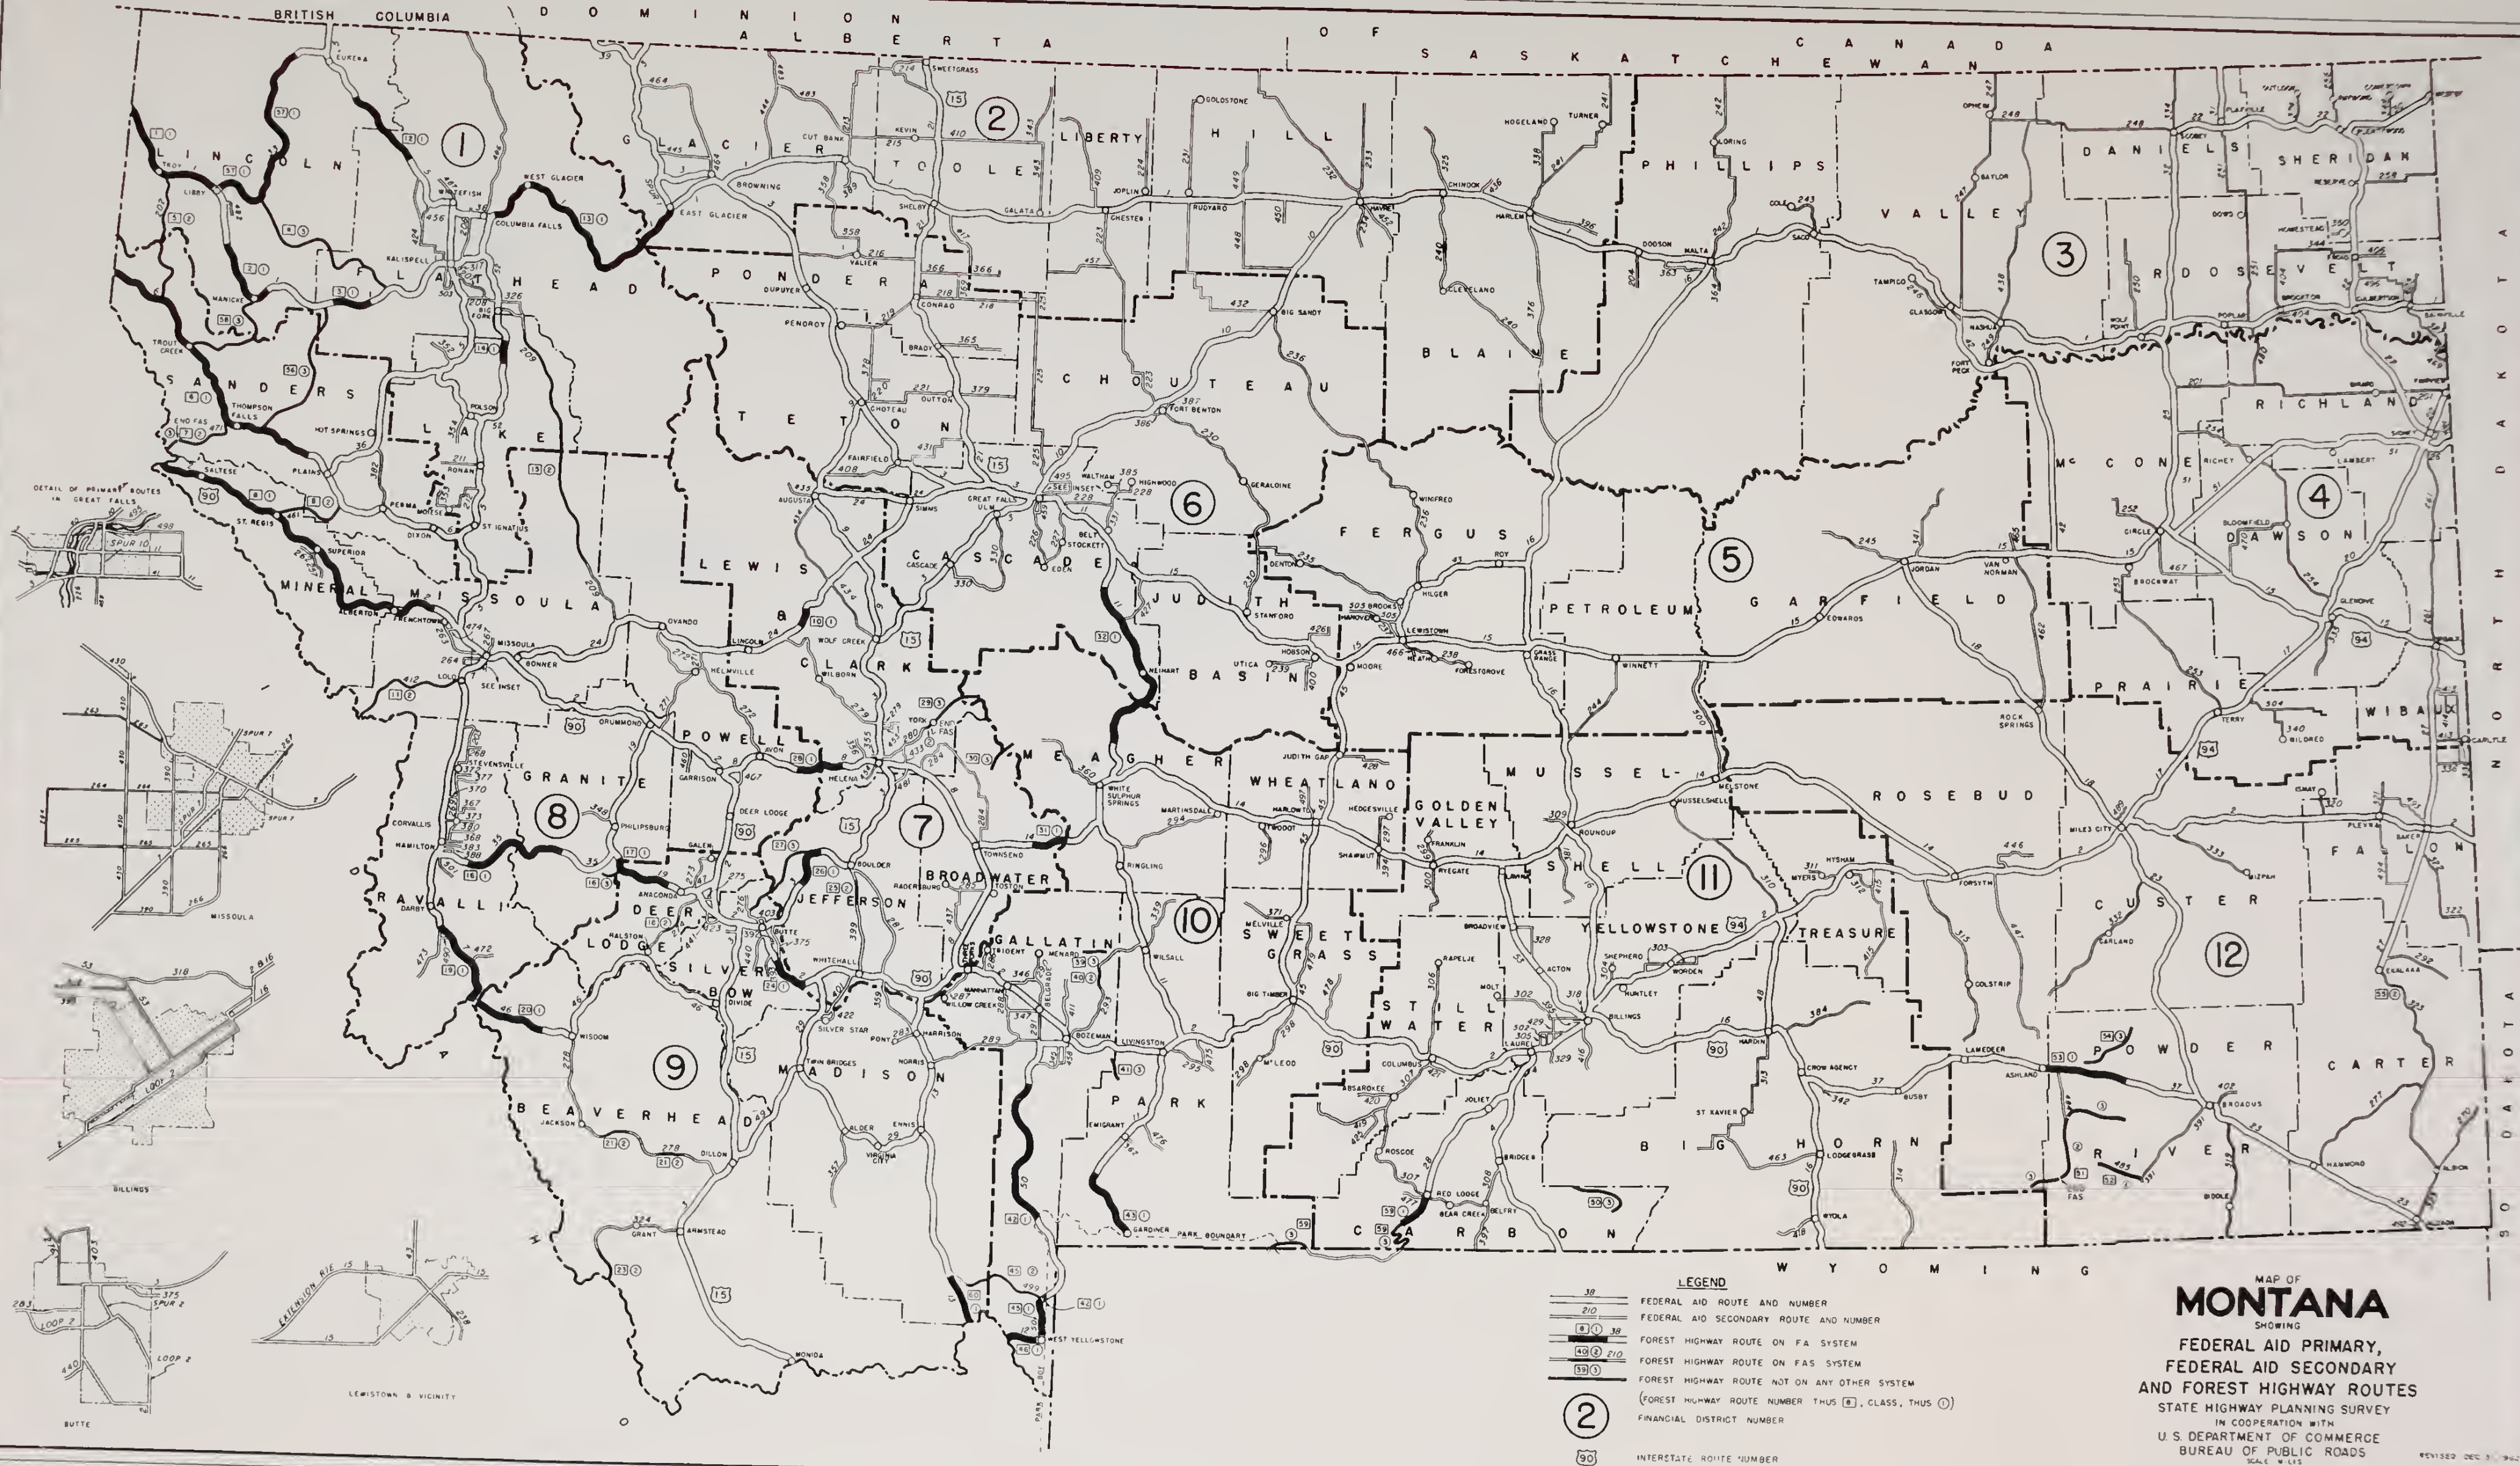

This column shows the average number per day of all types of trains crossing the railway-highway intersection. These are 1960 figures.

EXPOSURE FACTOR

The figure shown in this column is the product of the average daily highway traffic times the average daily train traffic. The result is a measure of the probability of accidents based on the highway and train traffic movements.

INDEX

This column shows the relative ratings for the crossings based on the value of the exposure factor. Since a low index number indicates a high hazard rating, the crossings are listed in descending order of hazard rating.

LEGEND

- 38 FEDERAL AID ROUTE AND NUMBER
- 210 FEDERAL AID SECONDARY ROUTE AND NUMBER
- 8 1 38 FOREST HIGHWAY ROUTE ON FA SYSTEM
- 48 2 210 FOREST HIGHWAY ROUTE ON FAS SYSTEM
- 59 1 FOREST HIGHWAY ROUTE NOT ON ANY OTHER SYSTEM
- (FOREST HIGHWAY ROUTE NUMBER THUS 8, CLASS, THUS 1)
- FINANCIAL DISTRICT NUMBER
- 2
- 90 INTERSTATE ROUTE NUMBER
